

OurAir
Mobile Air Purifiers
Delivering safer air
in the workplace

Virus-free, safer air For your workplace

 Individually-tested H14 HEPA filters¹ capture more than **99.995%** of viruses, bacteria & other micro-organisms 

High performance air flow rate for efficient air exchange

Low power consumption through optimized system and filter media design

Quiet operation, and discreet, neutral design for unobtrusive protection

Optional **UV-C stage** and **activated carbon prefilter** for odors, NO₂ and VOCs

The experts for your unique challenge

From HEPA upgrades to your HVAC system, air purification systems or real-time indoor air monitoring devices, MANN+HUMMEL is your development partner of choice for healthy air quality.

of Belgian, French and UK employees are worried about their health and safety at work because of COVID-19.²

of UK workers don't believe their employer will be able to guarantee their safety from coronavirus.²

You have a duty of care to provide a safe working environment – and that includes dangers circulating in the air.

Provide virus and allergen-free air in your office and reap the business benefits.

The office is somewhere to focus on the job at hand – not a place to worry about getting sick. But the COVID-19 pandemic has changed this for many – especially those that are clinically vulnerable. Are your colleagues focused on hitting their goals, or are they thinking about viruses circulating in the air around them? At the same time, more people are suffering due to airborne allergens. For these colleagues, it can be hard to work whilst contending with the symptoms of an allergy attack.

Current and potential employees are looking to you to provide them with a healthy space in which to work. And that includes what

measures you take to protect them from viruses and other airborne pollutants. People stay and work best in places where they feel comfortable.

OurAir mobile air purifiers will reduce the level of aerosol contaminants in your office and lessen the risk of infection – including current and future variants of Sars-Cov-2 and other viruses. With purified air, your team and visitors will feel happier, you'll help allergy sufferers to breathe deeply, and you can lower staff absence due to sick days too – meaning a quick return on your purifier investment.

¹ According to the ISO 29463 and EN 1822 standards

No retrofit, no fuss

Just a healthier, virus-free space

A long-term solution

The good thing about air purifiers is that they still have a role in a post-Corona era. Purifiers will make light work of flu viruses or pollen, so even allergy sufferers can breathe a sigh of relief safely. And to help your bottom line, air purifiers can also reduce the number of sick days your team take too.

Most offices are set-up to create a comfortable, pleasant environment for their occupants. That means the air conditioning system (if one is present at all) is targeted at cooling or warming the space, not protecting people from viruses and other harmful contaminants.

OurAir air purifiers from MANN+HUMMEL are all-in-one units that enable building owners to turn any indoor space into a virus-free indoor environment.*

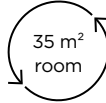

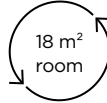

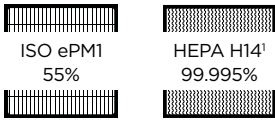

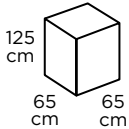

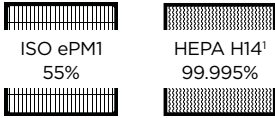

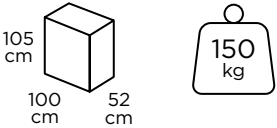

No retrofit or building works are required. **Simply plug 'n play and create a healthier space for your visitors and team.**

*H14 HEPA filters reliably capture >99.995% of viruses and bacteria.

The OurAir range

Something for every room

Each OurAir model is designed to meet the needs of different room sizes and applications. So, plug one in and deliver cleaner, virus-free purified air in your office.

	Air exchange rate / room size	Filtration efficiency	Air flow	Size & weight

Air with a cleanroom pedigree

We created the OurAir range on the strength of more than 60 years of experience in cleanrooms and operating theaters. Here, our filters protect people and the wider environment from some of the most dangerous viruses, substances and other contaminants known to man.

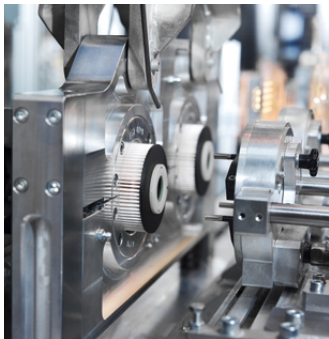

People were concerned about the air they were breathing even before a global pandemic hit. Now, it's at the forefront of their minds and will guide their actions for years to come.

Potential and current employees will no longer just judge your workplace on things like equipment, decor and location. They will factor in how seriously you take their health too.

OurAir can provide your employees and visitors with the peace of mind that the air they breathe in your office is purified by HEPA filters.

A filtration leader For more than 80 years

For more than eight decades MANN+HUMMEL has been finding new ways to separate the useful from the harmful.

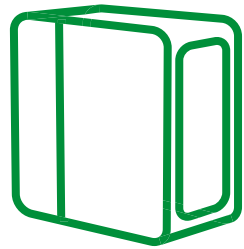

Today, more than 21,000 filter experts – of which around 1,000 in research and development – are working together to make our world cleaner.

26 filters roll off our production lines every second of every day.

So you can trust us to protect your team, your visitors and your business in the best possible way.
