

Ceiling System Air Purifier FCP 8008

Scalable, ceiling-mounted air purifier system with smart functionality for the best indoor air quality.

Performance that cares

- Effective removal of multiple pollutants
 Including fine dust PM2.5, formaldehyde, volatile organic compounds (VOCs), ozone, hydrocarbons, bacteria, cigarette smoke, and odors.
- Highly customizable
 Configure performance and functions to your individual air purification needs and budget.
- Compatible with regular ceiling systems
 Simple installation, pre- or post-renovation.
- Enabled by IoT technologies, managed with the OurAir App and Web Portal
 Allows smart management, predictive maintenance and easy, remote control by end-users.

Multi-phase protection

OurAir FCP 8008 employs a three-layer filtration technology developed by MANN+HUMMEL for high levels of air purification.

Pre-filtration layer

Capturing larger particles, such as coarse dust, hair and pollen.

Activated carbon layer

Removing gaseous pollutants, including formaldehyde, other VOCs and unwanted odors.

High performance layer

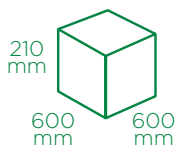

Trapping fine dust (PM2.5), smoke and bacteria.

Technical data

Effective coverage area	60 m ²
Sensor	PM2.5 laser sensor
Noise (silent mode)	42 dB(A)
Filter replacement indication	Yes
Filter lifetime	Up to 12 months
Max. rated power	45 W
Color	White

Dimensions & weight

Multiple operation modes

Automatic Mode

Boost Mode

Silent Mode
