

Air Quality Monitor SPS208

Professional-grade indoor air quality monitor that combines reliability and accuracy with a 7" touchscreen display.

Performance that cares

- Continuously monitors the air for a range of pollutants and conditions
Including particulate matter, total volatile organic compounds (TVOCs), CO₂, temperature and humidity.
- Meets global air quality monitoring standards
Including RESET grade B for commercial applications.
- Integrated touchscreen display
Easy-to-use interface showing current indoor air quality.
- Works seamlessly with the OurAir App and Web Portal
For convenient access to air quality data across your devices, wherever you are.

A full picture on air quality

OurAir SPS208 continuously monitors for the most common and most harmful airborne contaminants. It also tracks a variety of other parameters that affect indoor environments to give an all-round view of air quality in a location.

PM2.5: 1 - 999 $\mu\text{g}/\text{m}^3$

TVOCs: 125 - 600 ppb

CO₂: 400 - 2000 ppm

Temperature: 0 - 55 °C

Humidity: 5 - 95% RH

Technical data

Connection	Wi-Fi, 2.4G, Ethernet
Storage	8GB flash & optional SD card
Screen	7" full color touchscreen
Screen protection	Integrated cover
Battery	Lithium 4000 mAh
Input Power	DC-5V/2A
